2014 - Oxford University Press

A Numicon pilot project was conducted in an Australian primary school in 2012, to explore the impact of Numicon on achievement in mathematics,

particularly in the areas of number and algebra The 12-month intensive implementation of the Numicon approach into the school included professional development that supported

DIVISION STRATEGIES - intranet.yardley.bham.sch.uk

Using Numicon pegs to reinforce (as in Year 1), encouraging children to build Numicon patterns as they share the pegs and as - Grouping Eg There are 15 apples in a box How many bags of 5 apples can be filled? Ie How many groups of 5 can you make from 15? Pupils should explore grouping using the Numicon pieces to see

The Ultimate Guide to Hands On Maths Manipulatives

£40 for a box of 80 shapes on their own, complete one to one packs from £120, manuals are an additional cost, small group packs £250- £300 Amazon Numicon Try this similar card version of the shapes Numicon provides pegs to go in the plastic frames which are an additional cost but you could use any small counter or item instead Summary

Maths Calculation Policy ~ Multiplication and Division

Numicon should still play a large part in teaching and learning as it helps to consolidate the children's conceptual understanding of $16 \times 5 = 80$ TU (under 20) \times U TU (20-30) \times U Here children first need to multiply 07×7 writing the 9 in the answer box and placing the 4 underneath They then need to multiply 4×7 before
